## Work experience

### Ooba.kg

**Period:** September 2020/Now (9 months)

**Company profile:** Logistics company with own platform, which allows local clients and business to order goods from Chinese marketplaces like taobao.com, tmall.com, 1688.com

**Role:** Fullstack developer

**Responsibilities:** Support and develop company's product platform, create internal tools and systems, conduct interviews and code reviews

**Achievements:**

1. Rewrote the main platform from vuejs to nuxtjs to achieve SSR.
  - improved SEO
  - fixed old bugs
2. Wrote separate mobile version of the site.
  - allowed us to deliver more clean design and native like design
  - better time loads
  - not having to deal with adaptive design allowed us to have less logic in themarkup which resulted in fewer bugs.
3. Internal company tools like
  - live operator/client chat system using websockets(socket.io)
  - developed crm system which works for multiple clients(website, platforms)
  - upgraded legacy service, written in php, which dealt with 3rd party data providers, to newer stack using mongodb and nodejs

### Adiletsot

**Period:** June 2017/August 2020 (3 years)

**Company profile:** Supports and modernizes judicial system of Kyrgyz Republic

**Role:** Fullstack developer

**Responsibilities:** Support active systems, develop new products, conduct interviews

**Achievements:**

1. Supreme Court work system
  - support and bug fixes
  - developed module for generating various reports used by Supreme Court (30)
  - finished and fixed various algorithms for auto assigning judges to cases
2. Developed working system for court bailiffs
  - created fronted part from scratch using vuejs, worked with api written in RoR

- create service for generating pdf from html

3. Created backend part for news publishing tool using hapi.js

4. Fixed old wordpress engine which has been exposed to site vulnerability and was marked by Google as deceptive website

## Key skills
